Simon*i*7

Simon *i*7 Series

Elegant Simple
Unique Sophisticated

Simple and elegant as a piano

Its extensive face with vertical and proportionate lines gives a comfortable and desirable form. Adopting the latest technology, the switch and the socket have the same size. The visual effect is more aesthetically pleasant.

Multi-gang
design

i7 series of switches and sockets have multi-gang frames (up to 5 gangs) with multiple combinations.

A special SIMON mounting box is needed (60710-50) in order to emphasize the visual expression of the design.

Safe and soft push

The feeling, when pushing, is comfortable and easy as *i*7 adopts the J Shape Toggle system.

Due to the J shape toggle system, the angular movement is very precise (only 4.5 degrees) making the pushing feeling faster and safer.

Flexible wire, easy to connect

The saddle shape of the terminal has a wider wire.

The shade of the terminal avoid the wire to be damaged. As the wire is wider than the average ($0.55\text{mm}^2 \leq \varnothing \leq 6\text{mm}^2$), the house electricity system is easier to connect.

Simple and sophisticate

The base and the frame are
integrated with the same design.

Ultra extraordinary

The base, made of PC-steel material, has high strength
and no deformation.

The matt and techno color effect can adapt to any interior style and gives a sophisticate feeling. Three color options: white, champagne and grey.

Exquisite colors

White

Champagne

Grey

The new electronic technique enable energy saving

i7 adopts a new electronic technique, to achieve two-wire system of full load (which can be suitable for incandescent, fluorescent, halogen and LED with only two wires), that enables saving energy and reducing the use of carbon.

Touch time delay

Presence detector

Voice and light

i7

HDMI+USB, VGA-3.5 outlet, AV-S outlet.
i7 series TV, data and telecommunications sockets enable to meet the multimedia needs
for both home or commercial usage.
With i7, it is possible to enjoy entertainment and work efficiently.

Switches

Modules and frames are separated.
